

## **Our Vision**

The vision of the College is to carve a niche for itself as a premier institution offering quality education to the poverty-stricken, under-developed community of rural marshlands of Sundarban.

The college endeavors to strengthen character, broaden mind, dispel superstition, impart moral values and consequently develop generations of worthy and responsible human beings who will build our future society. We want our students to contribute constructively towards nation-building by upholding the values of secularism, national integration and social commitment. We have a vision that the students coming out of our campus should be intellectually enlightened, emotionally sound, physically strong and practically efficient. We envision them to champion the cause of justice, truth and peace and be always open to further growth to attain the Absolute.

The majority of the population belongs to socially and financially underprivileged category. A significant section belongs to impoverished minority groups. Their daily struggle to make both ends meet often becomes a hindrance to the process of learning. We take this as our challenge to educate them with proper moral values, how to become self independent. Not only higher education, but also a higher standard of imparting knowledge is a goal that the college tries to achieve. The rural position of the college, poor communication and the perpetually under developed locality are also key concerns. The area is threatened by cyclones and floods every monsoon and suffers from lack of basic facilities, e.g., inadequate power supply (which makes it extremely difficult to advance technologically). The nearest railway station is 24 km away and many students are dependent on irregular and infrequent ferry services across the nearby Moni river to reach the college. The proximity of the border area also has its disadvantages. However, they are enthusiastic, open to new ideas, and are willing to grasp in values. It is indispensable to have basic values and philosophies in proper place that will make our children responsible citizens in the future. Our attitude can make a lot of difference in our lives, and the lives around us. Such as empathy, one of the basic components of emotional intelligence. We find, if children are taught the skill to make decisions at an early age, they can learn to find the balance between intuition and reasoning in order to make effective decisions for their life. In today's world, challenges have become synonymous with everyday living. We are constantly faced with obstacles that require strong survival instincts to overcome. In our college we try to develop the skill and ability to solve obstacles in students' lives without being overpowered by fear. If we want our children to become better adults, we must teach them the importance of being accountable for their actions and words and teach them to rise above excuses. This helps them to improve consistently and set their own new benchmarks of success.

The College was established with a single mission to cater higher education to the poverty-stricken, under-developed community of this region and to develop the students into self-sufficient and responsible citizens through comprehensive education based on carefully prepared and well designed curriculum. Our mission is to impart quality education and exposure to the students and equip them to cope with the latest requirements, through innovative techniques and practices. We are confident that proper education is the best resort to uplift the youth in the rural and backward areas, and we are committed to facilitate meaningful education for our students, coming from far-away islands of the Sunderbans.
