

Post Graduation

The major challenges for our undergraduate students are the rural position of the college, poor communication and the perpetually under developed locality, and a regular threat by cyclones and floods every monsoon and consequent lack of basic facilities, e.g., inadequate power supply. The nearest railway station is 24 km away and many students are dependent on irregular and infrequent ferry services across the nearby Moni river to reach the college. The proximity of the border area also has its disadvantages. Bright students from local families often cannot cope with these unending handicaps and prefer to migrate away from the locality for higher education. This renders the journey towards academic excellence extremely challenging. On the other hand, as the college firmly believes that quality education is everybody's right and such exposure can uplift the entire community, Raidighi College offers three different kinds of Masters programs: **MSc**, **MA** and **MLIS**. We offer:

- 1) **MSc in Mathematics** from **Netaji Subhas Open University**,
- 2) **MA in Bengali, English, Political Science, Education, History** from **Rabindra Bharati University**,
- 3) **MLIS** from **Netaji Subhas Open University** and
- 4) **MA in Bengali, English, Political Science, Education, History and Geography** from **Netaji Subhas Open University**.

Our major objective has always been to equip the underprivileged youth of this rural community with the latest academic advancements, requirements and market demands through innovative techniques and practices.
