

Wall Magazine – Dpt. of Chemistry

Raiding the realms of molecules and elements, the Department of Chemistry at Raidighi College unveiled its vibrant wall magazine on December 16th, 2023. Principal Sir, gracing the inauguration ceremony, lent his support to this student-led initiative, igniting a spark of scientific curiosity across the campus.

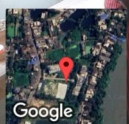

The wall magazine wasn't just a collection of colorful charts and diagrams; it was a portal to the microscopic world. Complex chemical reactions were simplified through playful illustrations, everyday objects deconstructed to reveal their molecular secrets, and scientific breakthroughs celebrated with inspiring write-ups. It was a testament to the students' creativity and their deep understanding of the fascinating world of chemistry.

Principal Sir's presence at the inauguration added a layer of academic validation, underscoring the importance of such student-driven endeavors. His encouraging words fueled the students' passion for their subject and instilled in them a sense of pride in their scientific pursuits.

The Chemistry Department's wall magazine wasn't a one-day event; it was a ripple effect that spread across the college. It sparked conversations in corridors, ignited curiosity in young minds, and reminded everyone that science isn't confined to textbooks, but is a vibrant world waiting to be explored. In essence, the wall magazine wasn't just a display; it was an invitation to join the thrilling adventure of chemical discovery.
